A joint endeavor presented by the [UCLA Ziman Center for Real Estate's Housing as Health Care Initiative](#), the [UCLA Center for Neighborhood Knowledge](#), the [UCLA Center for Health Policy Research](#) and the [UCLA Center for Occupational and Environmental Health](#)

"The Impact of Gentrification on Adult Mental Health"

presented by Diem Linda Tran, PhD

Associate, UCLA Center for Health Policy Research

Post-Doctoral Fellow, Department of Veterans Affairs & Stanford University

Wednesday, April 17, 2019

11:30 a.m. - 12:30 p.m.

Room B-117, Gold Hall

UCLA Anderson School of Management

Using detailed respondent and residential information available in a large, continuous population-based survey in California, we sought to understand the causal effect of gentrification on adult residents' mental health and identify residents most impacted. Our findings show that living in gentrified neighborhoods has a mental health cost on adults with low income, renters, and longtime residents.

[Diem Tran](#) holds a Master's Degree in Public Policy and a PhD in Health Policy and Management from UCLA. Her research centers on the social production of health inequities and disparities in health care stemming from public policies and inefficiencies in delivery systems. Diem is currently a postdoctoral fellow with the Department of Veterans Affairs and Stanford University.
